Data Sheet Fujitsu Storage ETERNUS AF650 S3 All-Flash Array

Storage Unchained

ETERNUS AF Storage

FUJITSU Storage ETERNUS AF series are incredibly fast and flexible all-flash storage systems for the next-generation data center. At an affordable price point, it makes flash the new normal for all tier-1 applications in enterprise IT. Response times are ultra-low - in fact, they set performance records. The ETERNUS AF is also built to be smart, with easily configurable automated quality of service to ensure each app gets the performance it needs, plus flexible deduplication and compression (except and disaster recovery capabilities make ETERNUS AF150) that can be turned on when required - and off when not. It keeps data safe with full-fledged DR with mirroring and automated transparent failover.

ETERNUS AF650 S3

The Fujitsu Storage ETERNUS AF650 S3 delivers leading storage performance and automated guality of service management, enabling a maximum of system utilization and contributing to a fast ROI. It is the perfect solution when consolidating data of largescale databases, business-critical applications and business analytics / big data - all into one all-flash system. Extensive high-availability ETERNUS AF650 an ideal storage system for any business data.

Features & Benefits

Main Features	Benefits
Flexible and flash optimized storage	
	Ultra-low response times for all applications and a massive increase of IOPS without complicated tuning measures as well as scalable capacity and connectivity.
Selective use of deduplication / compression	
	Data reduction at the volume level to improve storage efficiency and increase the lifespan of flash
Automated Quality-of-Service	
	Control applications priorities according to business needs, minimize admin efforts, automate monitoring and adjustment to guarantee service levels
Transparent failover and Storage Cluster	
	High redundancies enable business critical computing, data processing and real time data mirroring at the highest level and a system availability of up to 99.9999%.
Based on ETERNUS DX high-performance family architecture	, , , ,
	Performance-optimized design with proven and mature technology allows system availability of 99.9999%, along with seamless management across ETERNUS AF and ETERNUS DX storage systems.
Convincing access performance and latency	
 Random access performance: Up to 920,000 IOPS (8 KB Blocks) Sequential access performance: Max. 22 GB/s (128 KB Blocks) Latency: Less than 1 ms (4 KB Blocks) 	Sufficient performance for all applications requiring high data rates and low response times

Continuity management	Cumphronous and acumphronous		
Remote Copy functionality	Synchronous and asynchronous		
Note	The product may in connection with and depending on the specific configuration include elements to support time and performance-critical applications, however high availability (e.g., 99.9999%) and failsafe performance is not a standalone product feature. If and to the extent the product is to be used in such business-critical environments, it is within the sole responsibility of the user to set up the specific additional technical features (e.g., Storage Cluster), redundancies, and operational conditions as required to ensure such high availability or failsafe performance.		
Information security management			
Data confidentiality	HTTPS (SSL), SSH, CHAP, Bidirectional CHAP		
Data integrity	Data Block Guard, Data Encryption, Cache Protection, Disk Drive Patrol, Global Hot Spare, Dedicated Hot Spare, Cop back less, Drive shield, Fast Recovery		
Note	The properties of the product provide a baseline for product security and therefore end-customer IT security. However, these properties are not sufficient on their own to protect the product from all existing threats, such as intrusion attempts, data exfiltration and other forms of cyberattacks. To customize security settings, please use the configuration options as available for the respective product. During operation, the IT security of this product is within the responsibility of the respective administrator/end-user of the product. Please note, that Fujitsu as a manufacturer does not make any policy prescriptions or advocacy statements regarding IT security best practices and/or general product operation.		
Availability management			
Non-disruptive firmware upgrade	Yes		
Hot part replacement	Yes

Fujitsu products, solutions & services

In addition to Fujitsu ETERNUS AF650 S3, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio

Built on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offerings. This allows customers to select from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
